Craig and Bryant,

We need to get a summary table of EPA's air monitoring data collected from Arkema to David Gray ASAP. I saw Bryant's email with ASPECT summary report, which I can include, but we need to summarize the data our OSCs collected on the ground too.

They were collecting data every day. Can we get a table?

I think the best mechanism would be to Ashley at TCEQ to see what is available from the company and what is ready for publication

Is there a way to get that information? Who can we contact to gather it?

I think only the company was collecting summa canisters that would provide laboratory data. Our information would be associated with real-time air monitors which are directly read by the operator. I don't believe those instruments print out any readings.
